DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 1, 6, 8 and 10 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ohtsu et al.

Ohtsu et al show a method comprising steps of disposing a substrate having a conductive thin film (12); a photosemiconductive thin film on an insulative substrate (col. 11, lines 35-44); applies voltage between a selected region (the entire area); a counter electrode ((18) Fig 2.) and irradiating the selected region (col. 8, lines 50-65). The reference discloses an aqueous electrolyte solution with a property that solubility or dispersibility increases according to a changing of its pH (col. 6, line 60-65). The "light waveguide forming" of the preamble is not recited in the reference, however, the substrate of the reference would be considered capable of such utilization, in the absence of any further wave guide forming and/or product forming steps.

If not shown by the reference then the claims would be considered an obvious modification thereover because the substrate of the reference is capable of transmitting light a useful property for a light waveguide.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Claim 15 recites the limitation "after the step of forming the light waveguide" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Election/Restrictions

Claims 16-19 are withdrawn from consideration as not directed to the elected invention.

Allowable Subject Matter

8. Claims 2 and 9 are allowed.

9. Claims 3-5, 7 and 11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Akutsu et al show photoelectrodeposition.
